

HORECA Series

KPRO COMPACT

The new KPRO COMPACT is a direct flow reverse osmosis system, for usage in multiple applications

Ideal for dishwashers, ice- and coffee machines. The SMART programming, allows you to set the systems for your specific needs.

- Advanced RO membrane technology helps to deliver desirable TDS levels
- Long lifetime and low maintenance cost
- Designed for HORECA and a better result

Specifications

Product Name	KPRO COMPACT
Width	155 mm
Depth	401 mm
Height	456 mm
Weight	10,7 kg
Performance	
Production	2,6 Lpm
Rejection	1,0 Lpm
Inlet TDS (max.)	1500 ppm
Membrane	1000 GPD
System	
Power supply	24 VDC / 36 VDC
Electrical adapter	230 VAC 50/60 hz
Temperature (max/min)	38°C - 5°C
Pressure (max/min)	4bar - 1bar
External programmer	Smart DOT. Alarm/Setting

Features:

-  Tailored solution
-  Reverse osmosis
-  Compact design
-  High efficiency

Why choose the KPRO COMPACT?

The KPRO COMPACT is ideal for HORECA in multiple applications.

Use it in front of the dishwasher, for spot free glass- and tableware, or in front of the ice machine for crystal clear ice! By adding our blending-valve, the system is perfect for coffee machines and ensures the right taste.

With this in mind, it's no wonder that Kineticico technology is the world leader.
